This week Redevelopment project members attended the Blacktown hospital building site to learn more about the building commissioning phase.

The team were given a tour through the new clinical services building to observe the commissioning process and identify key considerations for Stage 1 at Westmead.

‘Seeing the input from planners, staff and the community realised into the bricks and mortar of the build was fantastic. It’s good to be able to look at other redevelopment projects to see what’s worked well and what could be improved,’ project director Deanne Turner (pictured) said. ‘We want to gather as much information as possible before Westmead precinct major works commence to ensure we have the best processes and practices in place moving forward. Everyone at Blacktown has done an amazing job.’

(Left to right): Emergency department clinical nurse consultant Margaret Murphy & acting ESSU nursing unit manager Evan Ferdous stocking medical supplies in the new unit.
Important information on our works

- Please be patient, there will be disruption on the campus over the next five years.
- Check signs around your usual parking area for upcoming changes as the project progresses.
- Follow instructions from site staff.
- Walk only on marked paths.
- Report any concerns or questions you have to the Project Office – 1800 990 296

On site this week

- Works continue to build the new car park.
- Car parking construction. Access to Oval is now closed until the new car park is opened in 2016.
- Infrastructure upgrades underway.
- High voltage works continue.
- Due diligence investigations for new helipad.
Road works along Institute Rd

20 January to early February 2016

From Wednesday 20 January to early February 2016 road works will be taking place along the new carpark side of Institute Rd. These works are to install a new kerb, footpath and infrastructure upgrades. This will provide clearer and safer access arrangements for pedestrians and vehicles around the new carpark.

Work will take place in stages, starting at the western end (towards Darcy Rd) and moving east (towards Redbank House).

Traffic control will be in place. One lane will be maintained on Institute Rd at all times.

Drive slowly and carefully, and follow instructions from site staff. Pedestrians, please stay on the marked paths.

Thanks for your co-operation.

WHERE

Road Works along Institute Rd from Wednesday 20 Jan through to early February 2016.
