THE CENTRAL ACUTE SERVICES BUILDING

The more than $1 billion Westmead Redevelopment is transforming healthcare in western Sydney.

As the biggest health infrastructure project in the state, it will revolutionise the Westmead Health Precinct and deliver an innovative, integrated facility that will continue to deliver high-quality healthcare for decades to come.

Stage 1 of the project includes the new 14-storey Central Acute Services Building (CASB), which will increase integration between Westmead Hospital, The Children’s Hospital at Westmead and the University of Sydney.

The CASB includes:

- Two new emergency departments (one for adults and one for children)
- 25 digital operating theatres
- Inpatient units with modern patient bedrooms
- State-of-the-art pharmacy and medical imaging
- Cardiac inpatient units • Sterilising service
- A NSW infectious diseases unit • A new helipad
- 1.5 floors occupied by the University of Sydney

The new entry plaza and forecourt features:
- Landscaped green spaces
- Connection to Parramatta Light Rail and Sydney Metro West

The overall design:
- Pays tribute to our indigenous history, with artwork and spaces of respect for Aboriginal culture
- Connects to the seven-level Innovation Centre

The CASB will be accessed by Hawkesbury Road when it opens early 2021.
